PROFESSIONAL SUMMARY

Results-driven Full-Stack Software Engineer and B.Tech Artificial Intelligence & Data Science undergraduate (Class of 2029) at Rathinam Technical Campus. Possesses comprehensive expertise in systems engineering, UI/UX design, and end-to-end deployment utilizing modern technology stacks, including React.js, TypeScript, RESTful APIs, and Supabase. Recognized as a top-tier problem solver and algorithmic thinker with a strong aptitude for architecting highly scalable and secure software infrastructure. Adept at integrating advanced AI models into real-world business applications to drive workflow automation and operational efficiency. Highly capable of delivering robust, production-ready digital solutions optimized to meet the rigorous standards of fast-paced multinational corporate (MNC) environments.

TECHNICAL SKILLS

Frontend Engineering: React 18, Next.js (App Router, Server Actions), TypeScript, JavaScript (ES6+), Tailwind CSS, Vite, HTML5, CSS3, Web Audio API

Backend & Distributed Systems: Node.js, Express.js, FastAPI (Python), RESTful APIs, Supabase Edge Functions (Deno), Docker containerization, Nginx reverse proxy

Databases, Cache & Storage: PostgreSQL, Supabase (Auth, Realtime, Row Level Security), pgvector, Redis (Upstash), Cloudflare R2 object storage, MongoDB, SQL

AI Integration & Gateway Routing: LLM API Orchestration (Grok API, Groq Llama 3.3, Anthropic Claude API, Gemini API, OpenRouter), RAG Architecture, Vector Search, Prompt Engineering, PyTorch Fundamentals

Data Validation & Quality Assurance: Pydantic (Type enforcement), Zod (Runtime schema validation), Playwright (E2E testing)

Cloud, DevOps & Automation: Git, GitHub Actions (CI/CD workflows), Vercel, Google Cloud Run, n8n Workflow Automation, Webhooks

EXPERIENCE

Lead Full-Stack & AI Engineer | Logic Intelligence Technologies

May 2026 - Present | Coimbatore, India

- Architect custom web designs and end-to-end full-stack solutions for enterprise clients, prioritizing system speed, security, and responsive user experience.
- Engineered a highly optimized Next.js UI architecture for a flagship client engagement, achieving a 99/100 Google Lighthouse performance score and successfully deploying the system from intake to production within a strict 7-day timeline.
- Develop and manage robust CI/CD pipelines to ensure reliable, zero-downtime hosting deployments that keep enterprise applications scalable and accessible 24/7.

PROJECTS

VoiceShield | Enterprise AI Voice Security & Risk Intelligence — Python, FastAPI, Real-Time Audio Processing, AI Analytical Models

- Engineered a scalable voice security and risk intelligence platform designed for businesses and enterprise organizations to dynamically detect and analyze voice risks.
- Built API-first backend integrations for asynchronous voice stream processing, enabling real-time risk signal detection and extracting structured evidence for BPOs, contact centers, and financial services.

Logic Voice | Personal AI Voice Assistant — React, Node.js, Web Audio API, Generative AI APIs

- Developed a voice-first personal AI assistant focused on conversational intelligence, enabling individual users to seamlessly research, understand, and execute daily tasks.
- Integrated robust voice-to-text processing pipelines and context-aware large language models to deliver a highly responsive and intuitive voice interaction experience with intelligent tool execution.

Intelligent Business AI Agent & RAG System — TypeScript, Next.js, Supabase, LLM Integrations

- Designed an autonomous business intelligence agent that utilizes Retrieval-Augmented Generation (RAG) on company-approved knowledge to automatically answer customer inquiries and qualify sales opportunities.
- Implemented structured, tool-assisted workflows featuring a smooth human-handoff protocol, optimizing routine support and inbound operations for SMB and enterprise teams.

EDUCATION

B.Tech - Artificial Intelligence & Data Science

2025 - 2029 (Expected)

Rathinam Technical Campus, Coimbatore, Tamil Nadu — Core subjects: Python for Data Science, Machine Learning Fundamentals, Algorithm Design, Statistical Modeling, SQL. AI Skills Hub - Centre of Excellence commitment secured.

CERTIFICATIONS

Full-Stack Development Workshop — Rathinam Technical Campus | Relational Databases — freeCodeCamp | Coding Essentials — Scaler | Generative AI vs. Traditional AI; Working with LLMs & Prompt Engineering Essentials — LinkedIn Learning | Design Thinking — IIT Bombay

ACHIEVEMENTS & HIGHLIGHTS

- Architected a centralized multi-channel automation hub integrating Email, SMS, Telegram, and WhatsApp Business Cloud API, achieving zero-loss dispatch for automated lead delivery and transactional notifications.
- Selected as a Microsoft Student Campus Ambassador (MSCA), driving technical community initiatives and mentoring peers on cloud engineering and AI developer workflows.
- Successfully onboarded high-value clients and delivered production-grade engagements within aggressive one-week deadlines.
- Deployed 5+ live full-stack and automated AI projects utilizing modern cloud infrastructure on GitHub Pages, Vercel, and Google Cloud Run.
